From the MTA Education Seminar 2005 - Advanced CMT TopicsPolish your CMT exam skills by hearing from the experts in the toughest exam areasOur Advanced CMT Topics track is designed for candidates in the CMT Program and recent graduates. This track covers seven topics with which candidates tend to have the most difficulty, particularly on the CMT Level 3 essay exam. The presentations cover three of the most complex topics:Japanese candle charting, point & figure charting and Elliott Wave Principle, all taught by practitioners. These areas seem to give candidates the most difficulty on the exams, so an hour with the experts should prove

to be a valuable education. The presentations on equities, foreign exchange, commodities and currencies are taught by individuals whose careers are dedicated to analyzing these markets. Many CMT candidates only focus on one of these markets; these sessions are designed to get candidates up to speed on analyzing markets with which they may not be familiar.Altogether, these seven sessions are designed to give attendees insights into how technical analysis Is applied in the real world. As well, these sessions are designed to be the perfect preparation for the essay questions on the CMT Level 3 exam which covers each of these areas. The insights of the practicing technicians who lead these sessions are representative of those insights required to pass the exams. These sessions were designed with CMT candidate feedback in mind. The Politicians. (1991). South America. Political Science. 19 mins. (Decade of Destruction Ser.). (YA). Age: 11-UP. (gr. 6 up). Produced by Adrian Cowell. It was Brazil's politicians who saw the Amason as the answer to their prayers. Here was the world's richest storehouse of raw materials & all over Brazil were millions of poor people who would come to help exploit it. The main obstacle was that the BR364 road was unpaved. So they went to the World Bank to finance the project, known as Polonoroeste. Jose Lutzenberger opposed it & took his fight to the U.S. Congress. He felt it was vital that provisions be made for the protection of the forests, Indians & rubber tappers. Eventually the World Bank was forced to admit their mistakes, but in the meantime hundreds of thousands of square miles of rainforest were burned. The 1989 elections however have brought new hope. The new president, Fernando Zollor appointed Jose Lutzenberger as the Minister of the Environment & fave him orders to stop deforestation in Amazonia. Portraits of Christ: An Overview of the Gospels, 1 DVD. Color. 3 hours mins. G. Video Released Apr. 2004. Instructed by Dan Hayden. AIn PORTRAITS OF CHRIST, Dr. Dan Hayden provides an enlightening overview of the Gospels. Dan explains their uniqueness as portraits of Jesus Christ, not biographies. In six 30-minute sessions, Dan masterfully answers many of the difficult questions about the Gospel writings: If the Gospels are really biographies, why are they so different in some places, and so similar in others? Are harmonies of the Gospels a good idea, or can they lead to problems? Why are there apparent contradictions in places? Can they be reconciled? What year was Jesus really born, and what was the sequence of events that happened during His final week on earth? Dan demonstrates how the writers of the Gospels, under the inspiration of the Holy Spirit, had specific intent as they wrote their works, drawing material together as they saw fit to portray Christ in His four distinct characteristics: as King, as Servant, as Man, and as God. The Profitable Trading Attitude, 3 discs. Color. 344 mins. mins. Video Released Aug. 2005. Instructed by Toni Turner. Big profits are made from "dumb" money or trades where the person on the other side of the trade is not smart enough to see what they are giving away or, more likely, too emotionally involved to let go. Toni Turner now provides a step-by-step guide to make sure you are on the winning side of those trades. By developing a trading plan and visualizing those trades,you'll be able to:-Establish the tone of your day to provide the best possible chance for gains -Create a routine that makes the most critical element of your day an unbreakable habit -Survey the market climate to determine what trades will win -Set up your trades to achieve your goals in any market climateThis breakthrough course will provide you with a personal evaluation system that exposes the emotional baggage that is costing you money in every trade. It will then break down these obstacles and hardwire your core strengths to your trading plan to significantly improve your percentage of profitable trades. Toni reveals her "Sidewalk" technique, developed through years of experience that resulted from painful losses and has helped develop consistent gains. This easy-to-understand strategy ties the impact of fear and greed and objective stops together into a powerful and objective approach. When you have to unravel your psychology and the psychology of the market from every trade, it amplifies the effort and risk of each trade. Lock down your trading plan and by removing your emotion, you will be able to see the opportunities in the market unfold before you and let you take the profits others are leaving on the table. The Psychological Residuals of Slavery. (1995). African American Studies. Color. 18 mins. Video Released Aug. 1995. Author Kenneth V. Hardy. Produced by Steve Lerner. Recent dramatic turning points in American race relations,the O.J. Simpson trial and Rodney King incident,have made it all too evident that the wounds left by centuries of enslavement have still not healed. As internationally acclaimed family therapist and educator Kenneth V. Hardy observes in this compelling video, slavery remains a "contemporary ghost" that shapes African Americans' self-image and their relationships with Whites and each other. Thus, understanding slavery and its legacy is essential for any human service provider working with African Americans. Against a backdrop of powerful historical and contemporary imagery of the African American experience, Dr. Hardy clearly demonstrates the importance of recognizing the past and openly addressing its contributions to current problems in the interest of focusing on genuine understanding and healing. This video is an excellent tool to stimulate discussion in clinical environments, classrooms, and other settings for enhancing cultural sensitivity and awareness. Guilford Pubns., Inc. VHS. The materialist, mechanomorphic paradigms of modern science are notoriously deficient as a basis for the scientific exploration of consciousness. In contrast, the radical empiricism first formulated by William James a century ago provides the epistemology of choice for the sciences of consciousness. A radical empiricism accommodates not only the observation of the behavioral, neural & molecular scientists, but also includes the perceptions of observers in mystical, psychedelic, shamanic, psychotic, addictive & paranormal states of consciousness. Workshop presents a heuristic model for the study of the full diversity of states of consciousness, focusing on three dimensions of excitation/sedation, agony/ecstasy & expansion/contraction. Includes 56-page pdf guide with introduction, diversity of opinions, related Scripture passages, and discussion questions on each program.? Bio on Dr. Michael GreenThis outstanding 12-part series was originally produced for European television. We follow host Dr. Michael Green on a search through the intellectual archives of modern civilization. These programs pull no punches and refuse to cave into political correctness. They confront prevailing multiculturalism and affirm the unique claims of the Gospel of Christ. Green forcefully exposes that all religions are not the same! And he shows why. These programs provide young people the foundation for intellectual integrity and Christian fidelity. A leader and user resource guide are included. The twelve programs:Disc 11. Who Is God? - Among all the angels, demons, spiritual beings and 'gods,' is there a God who is almighty, above everything?2. Does My Life Have Meaning? - If science says, ?I?m a fortunate accident-God is dead-there is no eternity,? then who am I and why am I here?3. Who?s Who in the Spirit World? - "There must be!" seems to be the general opinion about the existence of a spirit world, but what is it like?4. It Is Not Safe to Die - Most people agree on the presence of a spiritual realm, but we are not at all sure how that affects what happens to us after this life. Where are we going to end up?5. Who Is This Jesus? - Who is this rabbi who stated that he is the Way, the Truth and the Life? Is there any credibility in the belief that he came back to life after being crucified?6. One World, One Religion? - We are living in the age of the supernatural supermarket. Select your choice of spiritual flavor. It's all the same, really-or is it?Disc Two7. The Good, Bad and Suffering - A question that survives the ages: "If God is God and if Jesus loves us, why all this suffering? It should be so easy for him to end it all."8. Truth, Lies and Videotape - Is truth only what you make of it, and can a truth be true for you but not for me?9. Who Is This Spirit? - The Bible states that because of Jesus we can have a personal relationship with the one and only God. How can this happen?10. We Meant No Harm! - Absolute standards seem to be fading rapidly in the age of postmodernism. So if there is no standard, how do I judge myself?11. Can I Change Myself? - Everyone agrees on the fact that there is something wrong with the world. Change is needed. But, of course, for a better world, I have to be the first one to change. I can take care of that-or can I?12. Why on Earth the Church? - Individualism is a disease in the West. We seem to have this instinct to stay away from everyone. So why do I need to belong to a church?Dr. Michael Green is the author of over thirty books and has lectured widely in colleges and universities around the world. He served twelve years as a minister at Oxford and then became Professor of New Testament and Evangelism at Regent College in Vancouver, Canada. In addition to his Biblical scholarship, he is also an expert in classical languages, philosophy and ancient history. He is internationally known for his great gift in being able to couch his advanced scholarship in a clear and practical communications approach. Vision Video. DVD. Reflections of Self in Models of Consciousness: Research is Mesearch. (1999). Interpersonal Relations. Color. 60 mins. (Science & Consciousness Ser.). *Made-for-Video.* Video Released Jun. 1999. Beverly Rubik. Modeling consciousness is a daunting task, similar to an artist trying to paint her paintbrush. In consciousness studies, progress would be made if we would heal the rift between the so-called objective & subjective realms by recognizing that one's personal story & one's model of consciousness are enmeshed & dependent. This would raise the status of personal knowledge to that of an integral feature of consciousness studies & deconstruct the myth of objectivity, which perpetrates the concept of a divided self. This video proposes a contextual science of consciousness. Stories from the lives & thoughts of scholars on consciousness will be presented to illuminate these ideas. Message Co., The. VHS.
